Dear Commercial Airline Operators

During the COVID Pandemic the Ministry of Health and Wellness has given special consideration for authorized airline crew operating scheduled flight into Barbados to enter the country without a COVID-19 Test. This position has been taken despite the inherent risk.

The requirements of the crew are as follows:

For crew on island for less than 48 hours. Please note, no COVID Test is required.

1. Clear immigration and customs and proceed directly to the designated hotels
2. Transport to and from the designated hotel should be organized by the hotel or local agents
3. The crew should remain in the hotel until the time of flight departure
4. While on island, the crew shall not leave the hotel or invite any individual to their rooms. They are effectively in quarantine during this period
5. The crew are allowed to stay at the Ministry of Health and Wellness's approved Hotels

The following will apply for crew staying longer than 48 hours.

1. Crew is strongly advised to have a valid PCR COVID Test on arrival
2. For crew travelling without a COVID Test this will be administered in Barbados. The results will usually be issued within 24 hours
3. Quarantine at designated hotels for 24 hours while awaiting the test results will apply
4. Once negative, they are no restrictions

Your kind cooperation is greatly appreciated.

Yours faithfully,
